Week 32

Miscellaneous Review

		F	A	D	E
A					
	F		E		
		D		C	
					B
C	B	A	F		

Michael has 3 packs of gum. Each pack contains 5 pieces of gum. He wrote this addition sentence to show how much gum he has: $5 + 5 + 5 = 15$. How could he have shown the same information using a multiplication sentence?

Philip has 7 packages of licorice. Each package contains 5 pieces. Philip says he has a total of 12 pieces. His brother Kris said that isn't correct. Who is right, Philip or Kris? Explain.

Complete the following patterns and write their rule:

4	8	12	16				
---	---	----	----	--	--	--	--

What is the rule? _____

326	331	336	342			
-----	-----	-----	-----	--	--	--

What is the rule? _____

Students	1	2	3		5	6
Fingers	5	10		20		

What is the rule? _____
