

Orchard View Elementary

LEARNING SPHERE

IDEAS IN MOTION

Each year students in grades 1-5 participate in the annual Learning Sphere at Orchard View Elementary. Each participant selects one project to research, create, and present to the school and parents in the spring. Categories include mathematics, science, social studies, fine arts and media. The intent is to allow the students an opportunity to learn and expand their knowledge in an area of interest to them personally using the Multiple Intelligences.
